Greg and Brian,

These are the most recent versions of the industrial surface water intakes for York (17 points) and Lancaster (40 points) counties. I believe Marlen had pulled up this data while we were on a conference call for discussion, and we modified it (winnowed it down) on the fly while we were talking, so the full list may not have actually been sent. As I recall, it originally had “intakes” that were clearly identified as “Wells”, and we removed before sending this.

Please let me know if you need something else.

Bob

Is everyone available Thursday afternoon for a conference call to talk about our meetings last week and where we want to go from here?

Rich, are you available this Thursday to meet (or have a conference call) to discuss where we are going with the Susq. and Juniata Rivers response planning effort? After our meeting with York and Lancaster we thought it might be good for DEP, EPA and Weston to sit down and figure out where we want to go from here and exactly what info we need to collect etc. If Thursday doesn't work maybe next week? Tuesday and Wednesday are open for me next week.

Thanks

Greg
